Similar Species

The Hairy-Clawed Shore Crab is very similar to Asian Shore Crab. One easy way to tell the two apart is to look at the claws. The Hairy-Clawed Shore Crab has a hairy tuft between the pinchers of the claw. The Asian Shore Crab has a fleshy bulb-like structure in the same spot.

Fun Fact

The Hairy-Clawed Shore Crab can survive a range of temperatures from tropical to freezing waters. It can also lay eggs up to six times a year!
